## Projects

**Rental Aggregator Platform** | *MongoDB, Express.js, React.js, Node.js, JWT, RBAC*
- Developed a full-stack vehicle rental platform enabling users to browse, book, and manage rental vehicles through a responsive web interface.
- Built RESTful APIs for authentication, rental management, booking workflows, dashboards, cancellations, and owner-user communication.
- Implemented JWT Authentication, Role-Based Access Control (RBAC), and a demand notification feature that alerts owners when users search for unavailable vehicles.
- Designed MongoDB data models and MVC architecture, with in-platform messaging to connect users with vehicle owners for rental inquiries.
